### **Workshop I – Nutrition: “Make Healthy Choices” and cooking demonstration**

**Tuesday, August 3, 1:00 p.m. – 2:00 p.m.**

Health officials around the globe are encouraging more physical activity and better nutrition as ways to combat obesity. While there may not be a cure for obesity, we do have the ability to make responsible choices. With proper nutrition, exercise and simple lifestyle changes, the factors associated with obesity will be diminished. This workshop will introduce the basic nutrition concepts for health and fitness. The participant will understand the current dietary recommendations for maximizing well-being and minimizing risk of chronic diseases. The focus will target the use of tables, food guides, and guidelines for making healthy food choices. Materials include unique nutrition needs for selected stages of the lifecycle, methods for evaluating creditability of nutrition claims, safe and economic use of supplements, basic elements of food safety, diet for exercise and sports, and personal dietary evaluation techniques. Mrs. Roniece Weaver, MS, RD, LD will provide a cooking demonstration illustrating healthy choices enabling participants to be better informed. Mrs. Weaver's *New Soul Food Cookbook for People with Diabetes* was a blockbuster with more than 75,000 copies in print. The spectacular cooking demonstration will show you how to cut the fat, cholesterol, and salt in your favorite soul food recipes while still keeping the flavor you deserve! CME to be awarded.

### **Workshop II – Exercise: Small Moves Make a Difference**

**Tuesday, August 3, 2:00 p.m. – 3:00 p.m.**

Regular physical activity substantially reduces the risk of dying of coronary heart disease, the nation's leading cause of death, and decreases the risk for diabetes, high blood pressure and colon cancer. It also helps to control weight; contributes to healthy bones, muscles, and joints; reduces falls among the elderly; helps to relieve the pain of arthritis; reduces symptoms of anxiety and depression; and is associated with fewer hospitalizations, physician visits, and medications. Moreover, physical activity need not be strenuous to be beneficial; people of all ages benefit from moderate physical activity such as 30 minutes of brisk walking five or more times a week or toning, stretching and low impact exercises. The nation failed to meet four goals for improving the health status of Older Americans, physical activity, nutrition, weight and injuries and deaths due to falls. We must do our part to help reach the goals for Healthy People 2010! During this workshop, participants will experience warm-ups, flexibility/stretching, strength training, and low impact exercises with a Fitness Guru. CME to be awarded.
